

MINISTRY OF HEALTH & WELLNESS
TERMS OF REFERENCE
PROJECT MANAGER
ENHANCING HEALTH CARE DELIVERY PROJECT

1.0 BACKGROUND

Timely access to quality and affordable health services is critical for achieving Universal Access to Health and the health-related Sustainable Development Goals (SDGs). It is also an important benchmark for a sustainable and robust health system.

As the premier health care provider in Jamaica, the Ministry of Health and Wellness has embarked on a project designed to improve access to some critical services provided at public health facilities. This initiative builds on previous efforts to reduce wait time for services and is envisioned will result in shorter wait time for admissions as well as shorter hospital stays. The initiative is also set to reaffirm government's commitment to the Abolition of User Fees in public health facilities.

Entitled "Enhancing Health Care Delivery Project", the project will focus primarily on three (3) key areas negatively impacting the health sector's ability to respond timely to the health care needs of the population.

Component 1: Diagnostic Imaging and Radiology Services

In recognition of its resource constraints and inability to meet the growing demand for diagnostic services, the Ministry has been outsourcing the following imaging services under contractual arrangements with fifteen (15) approved service providers: CT scan, MRI, Ultrasound, Angiography, Endoscopy and Hispathology. Protocols have been developed for the operation of the component and patients accessing services in the public healthcare system are currently being referred for services to the aforementioned approved list of private imaging service providers. All costs for outsourced services are currently borne by the Government of Jamaica.

Component 2: Elective surgeries

The Ministry, through formal arrangements with private service providers, will under the project seek to increase the number of elective surgeries performed by making use of underutilized

private operating theatres. This intervention is expected to reduce the long waiting list for these procedures and contribute to the overall improved health status of many Jamaicans.

Component 3: Removal of Social cases from hospitals.

Also under the project, the Ministry will enter into formal arrangements with select nursing homes and infirmaries for the transfer of patients who have overstayed their time in public hospitals as a result of having no known family or residence.

2.0 OBJECTIVES

The services of a Project Manager will be required to provide technical support to the Ministry of Health & Wellness in the coordination of this project to ensure timely and effective implementation. Responsibilities will involve working closely with Programme Technical Advisor, the Regional Health Authorities (RHAs), private service providers and international development partners to determine and implement appropriate arrangements for the outsourcing and subsequent reintegration of those services that are the primary focus of the project.

The specific objectives of the consultancy will be:

1. To establish, for a period of two years, formal arrangements with approved private service providers for:
 - (i) the outsourcing of diagnostic imaging services
 - (ii) the transfer of social cases to long term care institutions, and
 - (iii) the use of private operating theatre for elective surgeries.
2. To formulate a detailed plan for the upgrade of diagnostic services in the public health sector using a phased approach that takes into consideration provisions for radiology under other national projects.
3. To oversee the successful implementation of phase I of diagnostic services upgrade plan, establishing practical arrangements for the continued roll out of activities post project.
4. To revise and develop, in collaboration with RHAs and other stakeholders, standard operating protocols/procedures, to support the successful implementation of project and the reintegration of services at the end of the project period.
5. To provide detailed monthly reports that accurately monitor project activities and budget; analyze issues and forecast trends in service delivery/use.

3.0 SCOPE OF SERVICES

The specific services of the Project Manager shall include, but not limited to the following:

- a. Prepare a detailed work plan to guide project implementation
- b. Develop contracts and Memorandum of Understandings for the engagement of private services providers/partners.
- c. Plan, organize and participate in the transparent tender bidding or request for proposal processes for the selection of private partners and ensure the preparation of the relevant reports.
- d. Participate in transparent and competitive selection of service providers.
- e. Establish and maintain proper professional relationships with relevant partner agencies in the public and private sectors, documenting for MOH's attention concerns/issues with services contracts/arrangements.
- f. Prepare a detailed plan for the phase upgrade of diagnostic services in the public health sector
- g. Identify and arrange training, as is necessary, for the management of Project during and post-project activities.
- h. Manage and coordinate, in collaboration with the Regional Health Authorities, day-to-day project activities.
- i. Supervise designated project personnel in the RHAs, and ensure effective communication and coordination between the Technical Programme Advisor, the Ministry of Health & Wellness/RHAs and other stakeholders.
- j. Assist in revising and formulating, in collaboration with RHAs and other stakeholders, standard operating protocols/procedures, to support the successful implementation of project and the re-integration of services at the end of the project period
- k. Organize and conduct at least one sensitization session per region for key administrative, technical and managerial health professionals critical to the project implementation.
 - l. Track and report on the progress of project implementation as per the work plan, identifying potential risks and making recommendations.
 - m. Ensure projects are properly closed out and project documentation completed and stored.

4.0 METHODOLOGY

The consultancy should be executed in a spirit of cooperation and inclusiveness. The Project Manager is expected to work in tandem with MOH&W technical team and the Office of the Permanent Secretary throughout all stages of the project. This individual is also expected to.

- Liaise with Technical Programme Advisor on all matters
- Work closely with RHAs and private service providers
